### DETAILED ACTION

1. Claims 1,2 and 4-6 stand rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility.

The invention is directed to a method and apparatus for expanding a data word from N digits to (N+M) digits so that data from multiplicity of hardware components such as shift register, code converter, multiplex or adder, which often have a different number of digit can be processed (see page 1, lines 16-22). However, according to the data expansion of the present invention as shown in figures 1 and 2, the value of the expanded word would be uncertain, and the result of a computation in the expanded words of data originally represented in two different word lengths would be incorrect. For example, a binary value 2 in a 4-digit word (0010) and a binary value 8 in a 6-digit word (001000), when converted, would result in the same number in the expanded word (0010000...01). Accordingly, the result of a computation, addition for example, on these values in the expanded words would be 0100000...010, and thus is incorrect. Therefore, the disclosed invention is inoperative, and thus lacks utility at least for the above reasons.

2. Applicant's arguments and worn declaration filed on 01-12-04 have been fully considered but they are not persuasive because both the arguments and the worn declaration fail to address the problem of the invention that the examiner raised in the rejection. Further, the example given in the declaration would be the same as that multiplying a decimal value 2 in 4-bit binary (0010) by a decimal value 1 in 4-bit binary (0001). The correct result would have

a decimal value 2 , and should be the same as the input decimal value 2 in the extended format.

However, the result in the example is different.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
